

AREA: Autonomous REsearch Assistants

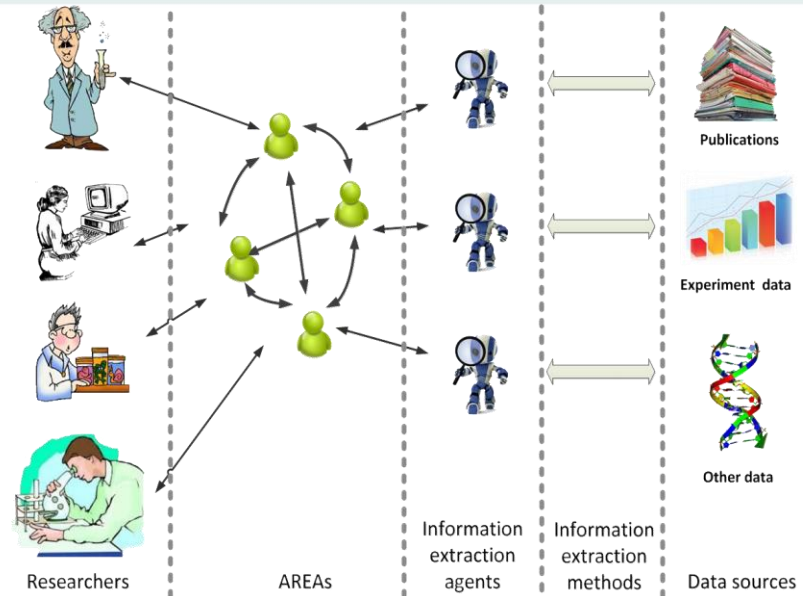

Aim: To create AREAS that will **mediate research communications** by producing, exchanging, consuming and reviewing research results

Vision: Routine tasks will be done by AREAs

- oversee experimental data acquisition;
- cope with information overload and adapt to their human supervisors;
- learn to “understand” research texts in natural languages;
- reconstruct/validate experiment set-ups, argumentation lines, methodology;
- perform meaningful literature reviews.

It will allow the **researchers to concentrate on the most creative aspects** of the research process

Current consortium:

- University of Warsaw (PL)
- Riga Technical University (LV)
- EUROCRIS (NL)
- Polytechnic University of Valencia (ES)
- Bauhaus University Weimar (DE)

Looking for:

- Scientific publishers
- Interested, complementary and extending the project
